Turn-Key Wipes Production Line

Fully Integrated Converting and Packaging System

Pinnacle Converting and Robinson, Inc. have teamed up to bring our customers a turn-key fully automated slitting and packaging line for processing non-woven material used in wipes production. This collaboration of two industry leaders provides our customers with a fully integrated and turn-key wipes production/packaging line. The current design includes every element from winder to pallet and everything in-between.

Pinnacle Converting *VERSA - SPR Slitter Rewinder*

With multiple spindles, the V-SPR significantly increases slit and perforated non-woven roll production rates.

Robinson Momentum Canister Loader

The Momentum loads up to 250 canisters per minute; doubling the speed of other loaders.
